

HAVE YOU BEEN DIAGNOSED WITH GLAUCOMA?

We are currently conducting a study for people who have been diagnosed with glaucoma or high eye pressure

You may be a possible candidate for this study if you meet the following criteria:

- ✓ Male or female, 18 years of age or older
- ✓ Have a diagnosis of glaucoma or high eye pressure
- ✓ Are on 0 to 2 ocular hypotensive medications
- ✓ No prior incisional glaucoma surgery

The objective of this study is to evaluate the safety and IOP-lowering efficacy of administering an iDose TR (travoprost intraocular implant) in conjunction with the placement of iStent infinite trabecular bypass system compared with placement of iStent infinite trabecular bypass system alone, in subjects with glaucoma or high eye pressure

The expected study duration is approximately 12 months

If you would like more information regarding this study, please contact our research department
